

Share your experience of Thyroid Eye Disease

This research project has been procured and funded by Amgen Limited. It is being conducted by the Picker Institute Europe. The content of the survey is being developed in conjunction with Picker and approved by Amgen Limited.

Picker Institute Europe is developing a survey to understand the experiences of UK adults living with TED, including aspects of care, quality of life, and what matters most to patients when accessing services. The survey is due to be launched in June 2026.

To support the development of this survey, we are carrying out:

- One-hour interviews via phone or video call to understand people's experiences of living with TED (January/ February 2026)
- One-hour interviews to test the survey questions and understand how to improve the questionnaire (March 2026)

For more information on the study and how you can take part please read the online information sheet at:
